General Chemistry Data
SECTION 1 - Surface Water Quality Data - Saugeen River, 35 Sideroad, former Artemesia Twp

Figure 1. Phosphorus concentrations in the Saugeen River, former Artemesia Twp.

Figure 2. Nitrate concentrations in the Saugeen River, former Artemesia Twp.

Figure 3. Chloride concentrations in the Saugeen River, former Artemesia Twp.

Figure 4. Suspended solids in the Saugeen River, former Artemesia Twp.
SECTION 2 - Surface Water Quality Data - Saugeen River, Con 2, former Glenelg Twp, upstream of Durham

**Figure 5.** Phosphorus concentrations in the Saugeen River, upstream of Durham.

**Figure 6.** Nitrate concentrations in the Saugeen River, upstream of Durham.

**Figure 7.** Chloride concentrations in the Saugeen River, upstream of Durham.

**Figure 8.** Suspended solids concentrations in the Saugeen River, upstream of Durham.
SECTION 3 - Surface Water Quality Data – Saugeen River, County Rd. 28, upstream of Hanover

Figure 9. Phosphorus concentrations in the Saugeen River, upstream of Hanover.

Figure 10. Nitrate concentrations in the Saugeen River, upstream of Hanover.

Figure 11. Chloride concentrations in the Saugeen River, upstream of Hanover.

Figure 12. Suspended solids concentrations in the Saugeen River, upstream of Hanover.
SECTION 4 - Surface Water Quality Data - Saugeen River, Yonge Street, Walkerton

Figure 13. Phosphorus concentrations in the Saugeen River, Walkerton.

Figure 14. Nitrate concentrations in the Saugeen River, Walkerton.

Figure 15. Chloride concentrations in the Saugeen River, Walkerton.

British Columbia WQ guidelines = 150 mg/L

Figure 16. Suspended solids concentrations in the Saugeen River, Walkerton.
SECTION 5 - Surface Water Quality Data - Saugeen River, Brant Elderslie Townline, upstream of Paisley

Figure 17. Phosphorus concentrations in the Saugeen River, upstream of Paisley.

Figure 18. Nitrate concentrations in the Saugeen River, upstream of Paisley.

Figure 19. Chloride concentrations in the Saugeen River, upstream of Paisley.

Figure 20. Suspended solids concentrations in the Saugeen River, upstream of Paisley.
SECTION 6 - Surface Water Quality Data - Saugeen River, Bruce Cnty Rd 3, downstream of Burgoyne

Figure 21. Phosphorus concentrations in the Saugeen River, downstream of Burgoyne.

Figure 22. Nitrate concentrations in the Saugeen River, downstream of Burgoyne.
Figure 23. Chloride concentrations in the Saugeen River, downstream of Burgoyne.

Figure 24. Suspended solids concentrations in the Saugeen River, downstream of Burgoyne.
SECTION 7 - Surface Water Quality Data – Hamilton Creek, Con 2, Lot 35, former Holland Twp

Figure 25. Phosphorus concentrations in Hamilton Creek.

Figure 26. Nitrate concentrations in Hamilton Creek.

Figure 27. Chloride concentrations in Hamilton Creek.

Figure 28. Suspended solids concentrations in Hamilton Creek.
SECTION 8 - Surface Water Quality Data – North Saugeen River, Con 8, former Sullivan Twp, Mooresburg

Figure 29. Phosphorus concentrations in the North Saugeen River, Mooresburg.

Figure 30. Nitrate concentrations in the North Saugeen River, Mooresburg.

Figure 31. Chloride concentrations in the North Saugeen River, Mooresburg.

Figure 32. Suspended solids concentrations in the North Saugeen River, Mooresburg.
SECTION 9 - Surface Water Quality Data – North Saugeen River, Lockerby dam, former Elderslie Twp

Figure 33. Phosphorus concentrations in the North Saugeen River, Lockerby.

Figure 34. Nitrate concentrations in the North Saugeen River, Lockerby.

Figure 35. Chloride concentrations in the North Saugeen River, Lockerby.

Figure 36. Suspended solids concentrations in the North Saugeen River, Lockerby.
SECTION 10 - Surface Water Quality Data – Rocky Saugeen River, West Back Line, southwest of Markdale

Figure 37. Phosphorus concentrations in the Rocky Saugeen River, southwest of Markdale.

Figure 38. Nitrate concentrations in the Rocky Saugeen River, southwest of Markdale.

Figure 39. Chloride concentrations in the Rocky Saugeen River, southwest of Markdale.

Figure 40. Suspended solids concentrations - Rocky Saugeen River, southwest of Markdale.
SECTION 11 - Surface Water Quality Data – Rocky Saugeen River, Con 2 WGR, former Bentinck Twp, Aberdeen

Figure 41. Phosphorus concentrations in the Rocky Saugeen River, Aberdeen.

PHOSPHORUS - Rocky Saugeen River, Aberdeen

Figure 42. Nitrate concentrations in the Rocky Saugeen River, Aberdeen.

NITRATE - Rocky Saugeen River, Aberdeen

Figure 43. Chloride concentrations in the Rocky Saugeen River, Aberdeen.

CHLORIDE - Rocky Saugeen River, Aberdeen

British Columbia WQ Guideline = 150 mg/L

Figure 44. Suspended solids concentrations in the Rocky Saugeen River, Aberdeen.

SUSPENDED SOLIDS - Rocky Saugeen River, Aberdeen
detection limit = 2.5 mg/L

CWQG = 3 mg/L

PWQO = 30 µg/L
SECTION 12 - Surface Water Quality Data – Beatty Saugeen River, old Hwy 6 bridge, downstream of Holstein

Figure 45. Phosphorus concentrations in the Beatty Saugeen River, downstream of Holstein.

Figure 46. Nitrate concentrations in the Beatty Saugeen River, downstream of Holstein.

Figure 47. Chloride concentrations in the Beatty Saugeen River, downstream of Holstein.

Figure 48. Suspended solids concentrations - Beatty Saugeen River, downstream of Holstein.
SECTION 13 - Surface Water Quality Data – Beatty Saugeen River, Normanby Bentinck Townline Rd, upstream of Hanover

Figure 49. Phosphorus concentrations in the Beatty Saugeen River, upstream of Hanover.

Figure 50. Nitrate concentrations in the Beatty Saugeen River, upstream of Hanover.

Figure 51. Chloride concentrations in the Beatty Saugeen River, upstream of Hanover.

Figure 52. Suspended solids concentrations - Beatty Saugeen River, upstream of Hanover.
SECTION 14 - Surface Water Quality Data – Camp Creek, Allan Park Rd, south of Allan Park

Figure 53. Phosphorus concentrations in Camp Creek.

Figure 54. Nitrate concentrations in Camp Creek.

Figure 55. Chloride concentrations in Camp Creek.

Figure 56. Suspended solids concentrations in Camp Creek.
SECTION 15 - Surface Water Quality Data – Styx River, Lot 17, Con 5, former Bentinck Twp

Figure 57. Phosphorus concentrations in the Styx River.

Figure 58. Nitrate concentrations in the Styx River.

Figure 59. Chloride concentrations in the Styx River.

Figure 60. Suspended solids concentrations in the Styx River.
SECTION 16 - Surface Water Quality Data – South Saugeen River, Egremont-Proton Townline, Cedarville

Figure 61. Phosphorus concentrations in the South Saugeen River, Cedarville.

Figure 62. Nitrate concentrations in the South Saugeen River, Cedarville.

Figure 63. Chloride concentrations in the South Saugeen River, Cedarville.

Figure 64. Suspended solids concentrations in the South Saugeen River, Cedarville.
SECTION 17 - Surface Water Quality Data – South Saugeen River, Wellington Cnty Rd 6, southwest of Mount Forest

Figure 65. Phosphorus concentrations - South Saugeen River, southwest of Mount Forest.

Figure 66. Nitrate concentrations in the South Saugeen River, southwest of Mount Forest.

Figure 67. Chloride concentrations in the South Saugeen River, southwest of Mount Forest.

Figure 68. Suspended solids concentrations - South Saugeen River, southwest of Mt Forest.
SECTION 18 - Surface Water Quality Data – South Saugeen River, Con 16, former Normanby Twp, northeast of Neustadt

**PHOSPHORUS** - South Saugeen River, northeast of Neustadt

![Phosphorus Concentrations Chart]

Figure 69. Phosphorus concentrations in the South Saugeen River, northeast of Neustadt.

**NITRATE** - South Saugeen River, northeast of Neustadt

![Nitrate Concentrations Chart]

Figure 70. Nitrate concentrations in the South Saugeen River, northeast of Neustadt.

**CHLORIDE** - South Saugeen River, northeast of Neustadt

![Chloride Concentrations Chart]

British Columbia WQ Guideline = 150 mg/L

Figure 71. Chloride concentrations in the South Saugeen River, northeast of Neustadt.

**SUSPENDED SOLIDS** - South Saugeen River, northeast of Neustadt

![Suspended Solids Concentrations Chart]

Figure 72. Suspended solids concentrations - South Saugeen River, northeast of Neustadt.
SECTION 19 - Surface Water Quality Data – Teeswater River, Con 2, former Carrick Twp, south of Mildmay

Figure 73. Phosphorus concentrations in the Teeswater River, south of Mildmay.

Figure 74. Nitrate concentrations in the Teeswater River, south of Mildmay.

Figure 75. Chloride concentrations in the Teeswater River, south of Mildmay.

Figure 76. Suspended solids concentrations in the Teeswater River, south of Mildmay.
SECTION 20 - Surface Water Quality Data – Teeswater River, Cnty Rd 16, west of Teeswater

Figure 77. Phosphorus concentrations in the Teeswater River, west of Teeswater.

Figure 78. Nitrate concentrations in the Teeswater River, west of Teeswater.

Figure 79. Chloride concentrations in the Teeswater River, west of Teeswater.

Figure 80. Suspended solids concentrations in the Teeswater River, west of Teeswater.
SECTION 21 - Surface Water Quality Data – Teeswater River, Con 6, former Greenock Twp, west of Chepstow

Figure 81. Phosphorus concentrations in the Teeswater River, west of Chepstow.

Figure 82. Nitrate concentrations in the Teeswater River, west of Chepstow.

Figure 83. Chloride concentrations in the Teeswater River, west of Chepstow.

Figure 84. Suspended solids concentrations in the Teeswater River, west of Chepstow.
SECTION 22 - Surface Water Quality Data – Teeswater River, Greenock Elderslie Townline Rd, upstream of Paisley

Figure 85. Phosphorus concentrations in the Teeswater River, upstream of Paisley.

Figure 86. Nitrate concentrations in the Teeswater River, upstream of Paisley.

Figure 87. Chloride concentrations in the Teeswater River, upstream of Paisley.

Figure 88. Suspended solids concentrations in the Teeswater River, upstream of Paisley.
SECTION 23 - Surface Water Quality Data – Muskrat Creek, Con Rd 4, southeast of Teeswater

Figure 89. Phosphorus concentrations in Muskrat Creek.

Figure 90. Nitrate concentrations in Muskrat Creek.

Figure 91. Chloride concentrations in Muskrat Creek. No chloride data available.

Figure 92. Suspended solids concentrations in Muskrat Creek.
SECTION 24 - Surface Water Quality Data – Clark Creek, Lake Range Rd, former Huron Twp

Figure 93. Phosphorus concentrations in Clark Creek.

Figure 94. Nitrate concentrations in Clark Creek.

Figure 95. Chloride concentrations in Clark Creek.

Figure 96. Suspended solids concentrations in Clark Creek.
SECTION 25 - Surface Water Quality Data – Pine River, Lake Range Drive, Lurgan Beach

Figure 97. Phosphorus concentrations in the Pine River.

Figure 98. Nitrate concentrations in the Pine River.

Figure 99. Phosphorus concentrations in the Pine River.

Figure 100. Suspended solids concentrations in the Pine River.
**SECTION 26 - Surface Water Quality Data – Penetangore River, Geddes Park, Kincardine**

**Figure 101.** Phosphorus concentrations in the Penetangore River, Kincardine.

**Figure 102.** Nitrate concentrations in the Penetangore River, Kincardine.

**Figure 103.** Chloride concentrations in the Penetangore River, Kincardine.

**Figure 104.** Suspended solids concentrations in the Penetangore River, Kincardine.
SECTION 27 - Surface Water Quality Data – Andrews Creek, Upper Lorne Beach Rd, north of Kincardine

Figure 105. Phosphorus concentrations in Andrews Creek.

Figure 106. Nitrate concentrations in Andrews Creek.

Figure 107. Chloride concentrations in Andrews Creek.

Figure 108. Suspended solids concentrations in Andrews Creek.
Figure 109. Phosphorus concentrations in the Little Sauble River.

Figure 110. Nitrate concentrations in the Little Sauble River.

Figure 111. Chloride concentrations in the Little Sauble River.

Figure 112. Suspended solids concentrations in the Little Sauble River.
SECTION 29 - Surface Water Quality Data – Underwood Creek, Bruce Road 33, former Bruce Twp

Figure 113. Phosphorus concentrations in Underwood Creek.

Figure 114. Nitrate concentrations in Underwood Creek.

Figure 115. Chloride concentrations in Underwood Creek.

Figure 116. Suspended solids concentrations in Underwood Creek.
SECTION 30 - Surface Water Quality Data – Mill Creek, Con 6, south of Port Elgin

Figure 117. Phosphorus concentrations in Mill Creek, Port Elgin.

Figure 118. Nitrate concentrations in Mill Creek, Port Elgin.

Figure 119. Phosphorus concentrations in Mill Creek, Port Elgin.

Figure 120. Phosphorus concentrations in Mill Creek, Port Elgin.
Escherichia coli Data
SECTION 31 – *Escherichia coli* Data

**Figure 121.** *E. coli* concentrations in the Saugeen River, Artemesia.

**Figure 122.** *E. coli* concentrations in the Saugeen River, upstream of Durham.

**Figure 123.** *E. coli* concentrations in the Saugeen River, upstream of Hanover.

**Figure 124.** *E. coli* concentrations in the Saugeen River, Walkerton.
Figure 125. *E. coli* concentrations in the Saugeen River, upstream of Paisley.

Figure 126. *E. coli* concentrations in the Saugeen River, downstream of Burgoyne.
